

Abdulla Fahem

Software Engineer & AI Lecturer

Tirana, Albania abdullaf2019@outlook.com +355 67 674 3674 linkedin.com/in/abdulla-fahem
github.com/abdullafahem

Software engineer with 5+ years building scalable web applications and APIs in PHP, Laravel, JavaScript and React. I work across full-stack delivery and Agile teams, and I teach deep learning and reinforcement learning at Universiteti Metropolitan Tirana.

EXPERIENCE

Founder
Apr 2026 – Present

AILinkedPost · Tirana, Albania

- Founded and built an AI SaaS that turns a single idea into a ready-to-publish LinkedIn post or designed carousel in under 30 seconds.
- Shipped style-matched writing in 12 languages, tone presets and plain-language AI refinement.
- Built scheduling, a content calendar and team workspaces with direct publishing to LinkedIn.

Software Engineer
May 2025 – Present

Lufthansa Industry Solutions · Tirana, Albania

- Design and maintain enterprise software in a PHP/Laravel environment across full-stack delivery.
- Build scalable back-end services and APIs, contributing to the front end where needed.
- Apply AI and automation to improve system functionality and process efficiency.
- Take part in solution design, testing, code reviews and documentation in Agile teams.
- Support deployment, troubleshooting and continuous improvement of production systems.

Lecturer
Oct 2026 – Present

Universiteti Metropolitan Tirana · Tirana, Albania

- Deliver lectures and hands-on seminars on neural networks, CNNs, RNNs, deep model training and reinforcement learning.
- Develop live coding demos and reproducible notebooks connecting theory to practice.
- Supervise student projects and prepare assessment and examination materials.

Head of Development & Full-Stack Developer
Dec 2023 – Present

Arbah Taiba · Madinah, Saudi Arabia (remote)

- Lead software development strategy for a real estate and development company.
- Architect and build the company's web platforms end to end.

SKILLS

BACK END

PHP · Laravel · MySQL · RESTful APIs

FRONT END

React · JavaScript · Accessible UI (WCAG)

AI & DATA

Deep learning · Reinforcement learning · Automation

DELIVERY

Scrum · Code reviews · Testing · Troubleshooting

EDUCATION

MSc, Data Science & Artificial Intelligence
University of Tirana · Oct 2024 – Sep 2026

Full-Stack Developer
May 2019 – Present

FahemDev · Independent

- Build web applications with Laravel and React.js across back end and front end.
- Design RESTful APIs connecting back-end services with front-end interfaces.
- Own databases, including schema design and optimization.
- Maintain existing codebases and ship new features with sprint planning and code reviews.

Front-end Developer
Jul 2023 – Nov 2023

WoW Digital · Tirana, Albania

- Built government web applications including KQZ, SIM and the Elbasan Municipality parking system.
- Developed responsive React.js interfaces that meet WCAG accessibility standards.
- Worked with UX/UI designers and back-end developers on performance, security and scalability.

Freelance Full-Stack Developer
2020 – 2022

Self-employed · Remote

- Delivered Veontime, Papaya and A-Tourism for clients in mobility, retail and tourism.

BSc, Computer Science
University of Tirana · Oct 2020 – Jul 2023
